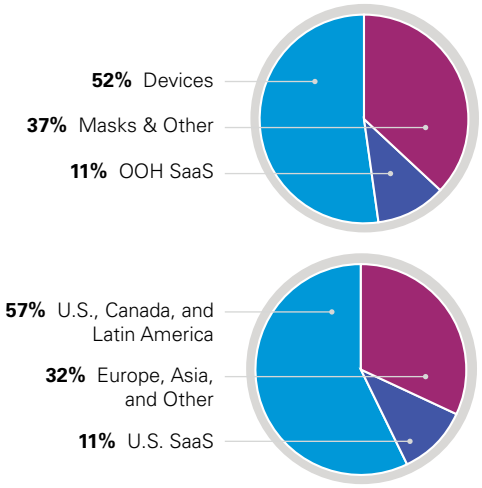
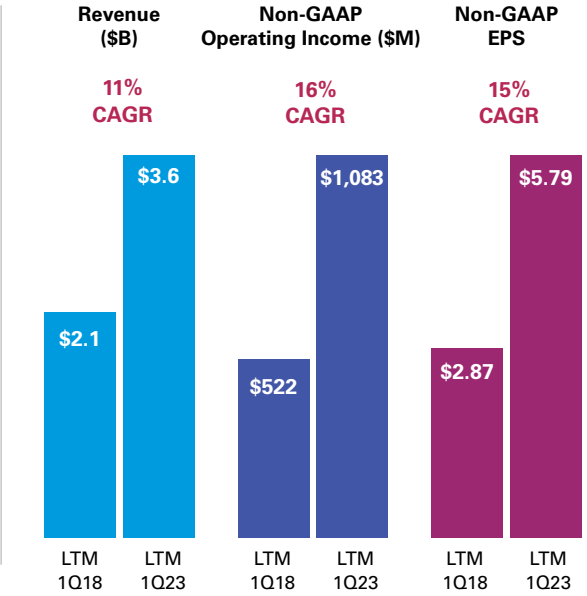
A global leader in digital health

At ResMed, we pioneer innovative solutions that treat and keep people out of the hospital, empowering them to live healthier, higher-quality lives. Our digital health technologies and cloud-connected medical devices transform care for people with sleep apnea, COPD, and other chronic diseases. Our comprehensive out-of-hospital software platforms support the professionals and caregivers who help people stay healthy in the home or care setting of their choice. By enabling better care, we improve quality of life, reduce the impact of chronic disease, and lower costs for consumers and healthcare systems in more than 140 countries.

Diversified revenue by business and by geography (LTM 1Q23)





The Healthcare Technology Report

Mick Farrell named **#1 Health Technology CEO of 2022**

America's Most Responsible Companies 2021 Newsweek statista

Named one of America's top 500 "Most Responsible Companies" twice (2021, 2022)

THE WALL STREET JOURNAL.

Named one of the "Management Top 250" companies twice (2020, 2021); top 25 among healthcare companies

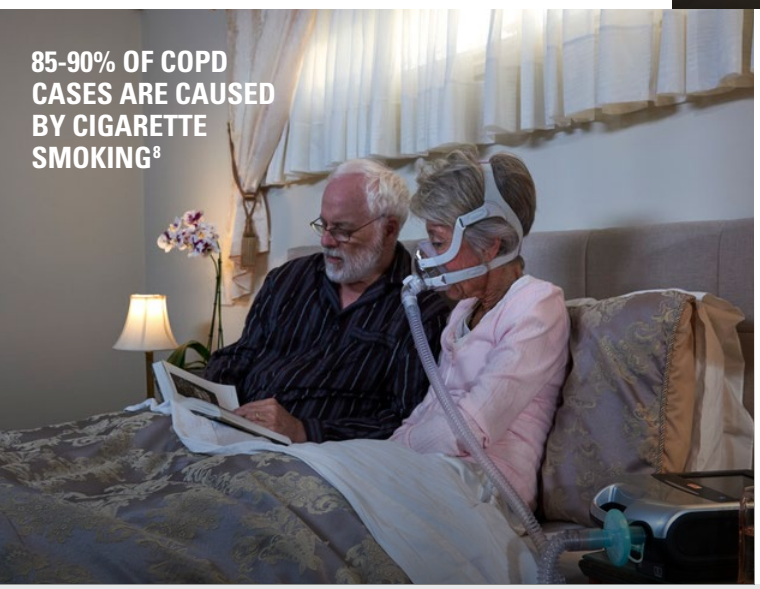
Sleep apnea

An estimated **936 million people** suffer from sleep apnea or sleep suffocation – the upper airway closes off causing the body to jolt "awake" to take breaths throughout the night.[1]

ResMed provides: CPAP therapy that's smaller, quieter, more comfortable, and more connected.

- **4% fewer inpatient and emergency dept. visits** for every nightly hour slept on CPAP[2]
- **39% lower all-cause mortality rate** when treating sleep apnea with CPAP[3]
- **87% patient adherence** on CPAP therapy when remotely and self monitored[4]



COPD/asthma/lung disease

An estimated **480 million people** suffer from chronic obstructive pulmonary disease,[9] the world's third leading killer.[10]

Over **330 million people** worldwide are living with asthma.[11]

ResMed provides: The world's most complete digital solution suite throughout a patient's journey.

- Cloud-connected invasive, non-invasive, and bilevel ventilation devices
- Non-invasive ventilation (NIV) reduces one-year risk of death in COPD patients by 76%[12]
- Propeller Health's digital health platform is compatible with most COPD and asthma inhalers. It helps increase medication adherence by 58%,[13] reduce COPD-related emergency visits by 45%,[14] and decrease asthma-related emergency visits and hospitalizations by 57%.[15]

SaaS

More people want to **age in place** or other low-cost **out-of-hospital** settings.

ResMed provides: Comprehensive cloud-based clinical, financial, and operational solutions that support healthcare providers across a range of care settings outside of the hospital.
