(1) Organization and Basis of Presentation

ResMed Inc. (referred to herein as "we", "us", "our" or the "Company") is a Delaware corporation formed in March 1994 as a holding company for the ResMed Group. Through our subsidiaries, we design, manufacture and market equipment for the diagnosis and treatment of sleep-disordered breathing and other respiratory disorders, including obstructive sleep apnea. Our manufacturing operations are located in Australia, Singapore, France, Germany, Malaysia and the United States. Major distribution and sales sites are located in the United States, Germany, France, the United Kingdom, Switzerland, Australia, Japan, Norway and Sweden.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the U.S. Securities and Exchange Commission ("SEC"). Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all necessary adjustments, which consisted only of normal recurring items, have been included in the accompanying financial statements to present fairly the results of the interim periods. The results of operations for the interim periods presented are not necessarily indicative of the results that may be expected for the year ending June 30, 2014.

The condensed consolidated financial statements for the three months ended September 30, 2013 and 2012 are unaudited and should be read in conjunction with the consolidated financial statements and notes thereto included in our Form 10-K for the year ended June 30, 2013.

(2) Recently Issued Accounting Pronouncements

In June 2011, the FASB issued authoritative guidance with respect to the presentation of other comprehensive income in financial statements. The main provisions of the standard provide that an entity that reports other comprehensive income has the option to present comprehensive income in either a single statement or in a two-statement approach. A single statement must present the components of net income and total net income, the components of other comprehensive income and total other comprehensive income, and a total for comprehensive income. In the two-statement approach, an entity must present the components of net income and total net income in the first statement, followed by a financial statement that presents the components of other comprehensive income, at total for other comprehensive income, and a total for comprehensive income. The adoption of this standard in fiscal year 2013 affected the presentation of our other comprehensive income but not our financial position or results of operations.

(3) Earnings Per Share

Basic earnings per share is computed by dividing the net income available to common stockholders by the weighted average number of shares of common stock outstanding. For purposes of calculating diluted earnings per share, the denominator includes both the weighted average number of shares of common stock outstanding and the number of dilutive common stock equivalents such as stock options and restricted stock units.

Stock options of 209,856 and 591,435 for the three months ended September 30, 2013 and 2012, respectively, were not included in the computation of diluted earnings per share as the effect of exercising these options would have been anti-dilutive.

Basic and diluted earnings per share for the three months ended September 30, 2013 and 2012 are calculated as follows (in thousands except per share data):

	Three Months Ended September 30,		
		2013	 2012

(6) Cost-Method Investments

The aggregate carrying amount of our cost-method investments at September 30, 2013 and June 30, 2013, was \$4.7 million and \$4.0 million, respectively, and is included in the non-current balance of other assets on the condensed consolidated balance sheets.

We periodically evaluate the carrying value of our cost-method investments, when events and circumstances indicate that the carrying amount of an asset may not be recovered. We estimate the fair value of our cost-method investments to assess whether impairment losses shall be recorded using Level 3 inputs. These investments include our holdings in privately held service and research companies that are not exchange traded and therefore not supported with observable market prices. However, these investments are valued by reference to their net asset values which can be market supported and unobservable inputs including future cash flows. During the three months ended September 30, 2013 and 2012, we recognized \$Nil and \$Nil, respectively, of impairment losses related to our cost-method investments. We have determined that the fair value of our investments exceed their carrying values.

The following table shows a reconciliation of the changes in our cost-method investments during the three months ended September 30, 2013 and 2012 (in thousands):

Credit Facility

During the year ended June 30, 2011, we entered into a credit agreement with lenders, including Union Bank, N.A., as Administrative Agent, Swing Line Lender and L/C Issuer, HSBC Bank USA, National Association, as Syndication Agent and Union Bank, N.A., HSBC Bank USA, National Association, Commonwealth Bank of Australia and Wells Fargo Bank, N.A. The credit agreement provides a \$300 million three-year revolving credit facility, with an uncommitted option to increase the credit facility by an additional \$100 million. The credit facility also includes a \$10 million sublimit for letters of credit. The credit facility terminates on February 10, 2014, at which time all unpaid principal and interest under the loans must be repaid. The outstanding principal amount due under the credit facility will bear interest at a rate equal to, at our option, either (i) LIBOR plus 1.5% to 2.0% (depending on the applicable leverage ratio) or (ii) a base rate, as defined in the credit agreement, plus 0.5% to 1.0% (depending on the applicable leverage ratio) apply on the unused portion of the credit facility. When we executed the credit agreement, we used a portion of the credit facility's initial funding proceeds to repay the outstanding balance under our previously existing revolving credit facility with Union Bank, N.A., which was then terminated.

Our obligations under the credit agreement are secured by (a) the corporate stock we hold in our subsidiaries ResMed Corp. and ResMed Motor Technologies Inc. ("ResMed Motor"), and (b) up to 65% of the ownership interests we hold in our subsidiary ResMed EAP Holdings LLC ("ResMed EAP"). Our obligations under the credit agreement are also guaranteed by our subsidiaries ResMed Corp. and ResMed Motor. The credit agreement contains customary covenants, including certain financial covenants and an obligation that we maintain certain financial ratios, including a maximum ratio of Funded Debt to EBITDA (each as defined in the credit agreement), an interest coverage ratio and a maximum amount of annual capital expenditures. The entire principal amount of the credit facility and any accrued but unpaid interest may be declared immediately due and payable if an event of default occurs. Events of default include failure to make payments when due, a default in the performance of any covenants in the credit agreement or related documents or certain changes of control of us or our subsidiaries ResMed Corp, ResMed Motor, ResMed Limited, ResMed Holdings Ltd/LLC or ResMed EAP.

On January 25, 2012, we entered into a first amendment to the credit agreement. The amendment increases, from \$300 million to \$400 million, the maximum principal amount that can be borrowed on a revolving basis under the credit agreement, subject to customary conditions.

At September 30, 2013, there was \$360.0 million outstanding under the credit agreement.

(10) Stock-Based Employee Compensation

We measure the compensation expense of all stock-based awards at fair value on the grant date. We estimate the fair value of stock options and purchase rights granted under the employee stock purchase plan (the "ESPP") using the Black-Scholes valuation model. The fair value of restricted stock units is equal to the market value of the underlying shares as determined at the grant date less the fair value of dividends that holders are not entitled to, during the vesting period. We recognize the fair value as compensation expense using the straight-line method over the service period for awards expected to vest.

We estimate the fair value of stock options granted under our stock option plans and purchase rights granted under the ESPP using the following assumptions:

	Three Months Ended September 30,

Stock options:						
Weighted average grant date fair value	\$ —	\$ 8.01

(11) Stockholders' Equity

Common Stock. On August 24, 2011, our board of directors approved a new share repurchase program, authorizing us to acquire up to an aggregate of 20.0 million shares of ResMed Inc. common stock. The program allows us to repurchase shares of our common stock from time to time for cash in the open market, or in negotiated or block transactions, as market and business conditions warrant. This program canceled and replaced our previous share repurchase program authorized on May 27, 2009 pursuant to which we had repurchased 10.0 million shares. These were in addition to the 6.6 million shares repurchased under an earlier program authorized on June 6, 2002. The new program authorizes us to purchase in addition to the shares we repurchased under our previous programs. There is no expiration date for this program. All share repurchases since August 24, 2011 have been executed in accordance with this program.

During the three months ended September 30, 2013, we repurchased 0.4 million shares at a cost of \$21.1 million. Since the inception of our share repurchase programs and through September 30, 2013, we have repurchased a total of 32.5 million shares at a cost of \$1.1 billion. Shares that are repurchased are classified as treasury stock pending future use and reduce the number of shares outstanding used in calculating earnings per share. At September 30, 2013, 4.1 million additional shares can be repurchased under the approved share repurchase program.

Preferred Stock. In April 1997, the board of directors designated 2,000,000 shares of our \$0.01 par value preferred stock as Series A Junior Participating Preferred Stock. No such shares were issued or outstanding at September 30, 2013 and June 30, 2013.

Stock Options and Restricted Stock Units. We have granted stock options and restricted stock units to personnel, including officers and directors, in accordance with ResMed Inc. 2009 Incentive Award Plan (the "2009 Plan"). These options and restricted stock units have expiration dates of seven years from the date of grant and vest over one to four years. We have granted the options with an exercise price equal to the market value as determined at the date of grant.

The maximum number of shares of our common stock authorized for issuance under the 2009 Plan is 35.5 million shares. The number of securities remaining available for future issuance under the 2009 Plan at September 30, 2013 is 10.2 million. The number of shares of our common stock available for issuance under the 2009 Plan will be reduced by (i) three (3.0) shares for each one share of common stock delivered in settlement of any "full-value award," which is any award other than a stock option, stock appreciation right or other award for which the holder pays the intrinsic value and (ii) one share for each share of common stock delivered in settlement of any individual during any calendar year, may not exceed 3 million shares of our common stock (except in a participant's initial year of hiring up to 4.5 million shares of our common stock may be granted).

At September 30, 2013, there was \$66.4 million in unrecognized compensation costs related to unvested stock-based compensation arrangements. This is expected to be recognized over a weighted average period of 2.3 years. The aggregate intrinsic value of the stock-based compensation arrangements outstanding and exercisable at September 30, 2013 was \$314.1 million and \$146.2 million, respectively. The aggregate intrinsic value of the options exercised during the three months ended September 30, 2013 and 2012, was \$11.5 million and \$21.7 million, respectively.

Each offering period under the ESPP will be for a period of time determined by the board of directors' compensation committee of no less than 3 months and no more than 27 months. The purchase price for our common stock under the ESPP will be the lower of 85% of the fair market value of our common stock on the date of grant or 85% of the fair market value of our common stock on the date of purchase. An individual participant cannot subscribe for more than \$25,000 in common stock during any calendar year. At September 30, 2013, the number of shares remaining available for future issuance under the ESPP is 2.1 million shares.

(12) Fair Value Measurements

In determining the fair value measurements of our financial assets and liabilities, we consider the principal and most advantageous market in which we transact and consider assumptions that market participants would use when pricing the financial asset or liability. We maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The hierarchies of inputs are as follows:

- Level 1: Input prices quoted in an active market for identical financial assets or liabilities;
- Level 2: Inputs other than prices quoted in Level 1, such as prices quoted for similar financial assets and liabilities in active markets, prices for identical assets and liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable market data; and
- Level 3: Input prices quoted that are significant to the fair value of the financial assets or liabilities which are not observable nor supported by an active market.

The following table summarizes our financial assets and liabilities, as at September 30, 2013 and June 30, 2013, using the valuation input hierarchy (in thousands):

Level 1	Level 2	Level 3	Total
\$ —	\$(7,882)	\$ —	\$(7,882)
\$ —	\$ —	\$(7,423)	\$(7,423)
\$ —	\$(7,000)	\$ —	\$(7,000)
\$ —	\$ —	\$(7,779)	\$(7,779)
	\$ — \$ —	\$	\$

We determine the fair value of our financial assets and liabilities as follows:

Foreign currency hedging instruments – These financial instruments are valued using third-party valuation models based on market observable inputs, including interest rate curves, on-market spot currency prices, volatilities and credit risk.

Contingent consideration – These liabilities include the fair value estimates of additional future payments that may be required for some of our previous business acquisitions based on the achievement of certain performance milestones. Each potential future payment is valued using the estimated probability of achieving each milestone, which is then discounted to present value.

The following is a reconciliation of changes in the fair value of contingent consideration during three months ended September 30, 2013 (in thousands):

	Three Months	Ended September 30, 2013
Balance at the beginning of the period	\$	(7,779)
Payments		442
Foreign currency translation adjustments		(86)
Balance at the end of the period	\$	(7,423)

We did not have any significant non-financial assets or liabilities measured at fair value on September 30, 2013 or June 30, 2013.

(13) Legal Actions and Contingencies

Litigation

In the normal course of business, we are subject to routine litigation incidental to our business. While the results of this litigation cannot be predicted with certainty, we believe that their final outcome will not, individually or in aggregate, have a material adverse effect on our consolidated financial statements taken as a whole.

In March 2013, we filed parallel legal actions in the International Trade Commission, or ITC, and in U.S. district court against Taiwanese manufacturer APEX and its U.S. distributor to stop the infringement of several ResMed patents. In July 2013, the ITC entered a consent decree against the U.S. distributor, ordering that it not import or sell after import certain products we accused of infringing our patents. In August 2013, the ITC entered a consent decree against APEX, ordering that it not import or sell after import products that infringe the claims of the patents that ResMed asserted against APEX. Thereafter, APEX initiated inter partes review proceedings in the U.S. Patent and Trademark Office, or PTO, challenging the validity of most of the claims asserted against APEX in the ITC. The U.S. distributor court has stayed the litigation against APEX and the U.S. distributor pending the resolution of the inter partes review by the PTO. APEX has advised the ITC that is has redesigned the accused products and requested that the ITC determine that those products are not subject to the consent decree. Therefore the matter is ongoing as to APEX. However, we do not expect the outcome of this matter to have a material adverse effect on our consolidated financial statements when taken as a whole.

In June 2013, we filed a lawsuit in U.S. district court against Chinese manufacturer BMC Medical Co., Ltd and its U.S. affiliates to stop the infringement of several ResMed patents. In July 2013, we amended the district court lawsuit, and filed a parallel proceeding in the ITC. The ITC initiated an investigation of BMC's alleged infringement in August 2013, and that matter is proceeding in the normal course. The district court lawsuit has been stayed by the court pending the conclusion of the ITC proceeding. The BMC matter is ongoing. However, we do not expect the outcome of this matter to have a material adverse effect on our consolidated financial statements when taken as a whole.

(14) Derivative Instruments and Hedging Activities

We transact business in various foreign currencies, including a number of major European currencies as well as the Australian and Singapore dollars. We have significant foreign currency exposure through both our Australian and Singaporean manufacturing activities, and international sales operations. We have established a foreign currency hedging program using purchased currency options and forward contracts to hedge foreign-currency-denominated financial assets, liabilities and manufacturing cash flows. The terms of such foreign currency hedging contracts generally do not exceed three years. The goal of this hedging program is to economically manage the financial impact of foreign currency exposures denominated mainly in Euros, Australian and Singapore dollars. Under this program, increases or decreases in our foreign currency denominated financial assets, liabilities, and firm commitments are partially offset by gains and losses on the hedging instruments.

We do not designate these foreign currency contracts as hedges. We have determined our hedge program to be a non-effective hedge as defined under the FASB issued authoritative guidance. All movements in the fair value of the foreign currency instruments are recorded within other income, net in our condensed consolidated statements of income. We do not enter into financial instruments for trading or speculative purposes.

We held foreign currency instruments with notional amounts totaling \$391.4 million and \$462.1 million at September 30, 2013 and June 30, 2013, respectively, to hedge foreign currency fluctuations. These contracts mature at various dates prior to September 30, 2016.

The following table summarizes the amount and location of our derivative financial instruments as of September 30, 2013 and June 30, 2013 (in thousands):

Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The following is an overview of our results of operations for the three months ended September 30, 2013. Management's discussion and analysis of financial condition and results of operations is intended to help the reader understand the results of operations and financial condition of ResMed Inc. Management's discussion and analysis is provided as a supplement to, and should be read in conjunction with selected financial data and condensed consolidated financial statements and notes, included herein.

We are a leading developer, manufacturer and distributor of medical equipment for treating, diagnosing, and managing sleep-disordered breathing ("SDB") and other respiratory disorders. During the three months ended September 30, 2013, we continued our efforts to build awareness of the consequences of untreated SDB, and to grow our business in this market. In our efforts, we have attempted to raise awareness through market and clinical initiatives highlighting the relationship between SDB/obstructive sleep apnea and co-morbidities, such as cardiac disease, diabetes, hypertension and obesity, as well as the dangers of sleep apnea in regard to occupational health and safety, especially in the transport industry.

We are committed to ongoing investment in research and development and product enhancements. During the three months ended September 30, 2013, we invested \$27.4 million on research and development activities. Since the development of continuous positive airway pressure ("CPAP") therapy, we have developed a number of innovative products for SDB and other respiratory disorders including airflow generators, diagnostic products, mask systems, headgear and other accessories. Our new product release schedule remains active across both our mask and flow generator categories. We are taking steps to increase awareness of the health dangers of SDB by sponsoring educational programs targeted at the primary care physician community. We believe these efforts should further increase awareness of both doctors and patients about the relationship between SDB, obstructive sleep apnea and co-morbidities such as cardiac disease, diabetes, hypertension and obesity. We also believe these efforts should help inform the community of the dangers of sleep apnea in occupational health and safety, especially in the transport industry.

During the three months ended September 30, 2013, our net revenue increased by 5% when compared to the three months ended September 30, 2012. Gross margin was 63.7% for the three months ended September 30, 2013 compared to 61.4% for the three months ended September 30, 2012. Diluted earnings per share for the three months ended September 30, 2013 increased to \$0.56 per share, up from \$0.49 per share in the three months ended September 30, 2012.

At September 30, 2013, our cash and cash equivalents totaled \$976.6 million, our total assets were \$2.3 billion and our stockholders' equity was \$1.7 billion.

In order to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency fluctuations, we provide certain financial information on a "constant currency basis", which is in addition to the actual financial information presented. In order to calculate our constant currency information, we translate the current period financial information using the foreign currency exchange rates that were in effect during the previous comparable period. However, constant currency measures should not be considered in isolation or as an alternative to U.S. dollars measures that reflect current period exchange rates, or to other financial measures calculated and presented in accordance with U.S. GAAP.

Net Revenue

Net revenue increased for the three months ended September 30, 2013 to \$357.7 million compared to \$339.7 million for the three months ended September 30, 2012, an increase of \$17.9 million or 5%. The increase in net revenue is primarily attributable to an increase in unit sales of our flow generators, masks and accessories. Movements in international currencies against the U.S. dollar favorably impacted revenues by approximately \$3.6 million for the three months ended September 30, 2013.

Net revenue in North and Latin America increased for the three months ended September 30, 2013 to \$201.5 million from \$194.4 million for the three months ended September 30, 2012, an increase of 4%. We believe this increase primarily reflects growth in the overall SDB market. Net revenue in markets outside North and Latin America, for the three months ended September 30, 2013, increased to \$156.2 million from \$145.4 million for the three months ended September 30, 2012, an increase of 7%. We believe this increase in revenue outside North and Latin America primarily reflects growth in the overall SDB market.

Net revenue from the sales of flow generators, including humidifiers, for the three months ended September 30, 2013 totaled \$191.8 million, an increase of 6% compared to the three months ended September 30, 2012 of \$181.5 million, including increases of 5% in North and Latin America and 7% elsewhere. Net revenue from the sales of masks and other accessories for the three months ended September 30, 2013 totaled \$165.9 million, an increase of 5% compared to the three months ended September 30, 2012 of \$158.3 million, including increases of 3% in North and Latin America and 9% elsewhere. We believe these increases primarily reflect growth in the overall SDB market.

The following table summarizes the percentage movements in our net revenue for the three months ended September 30, 2013 compared to the three months ended September 30, 2012:

				International	Total
	North and			(Constant	(Constant
	Latin America	International	Total	Currency) *	Currency) *
Flow generators	5%	7%	6%	4%	4%
Masks and other accessories	3%	<u> </u>	<u> </u>	<u> </u>	4%
Total	4%	7%	<u> 5</u> %	5%	4%

Constant currency numbers exclude the impact of movements in international currencies.

Gross Profit

Gross profit increased for the three months ended September 30, 2013 to \$228.0 million from \$208.6 million for the three months ended September 30, 2012, an increase of \$19.3 million or 9%. Gross profit as a percentage of net revenue for the three months ended September 30, 2013 increased to 63.7% from 61.4% for the three months ended September 30, 2012.

The improvement in gross margins for the three months ended September 30, 2013 was primarily due to favorable change in product mix as sales of our higher margin products represented a higher proportion of our net revenue, cost savings attributable to the depreciation of the Australian dollar against the U.S. dollar and manufacturing and supply chain improvements, partially offset by declines in our average selling prices.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased for the three months ended September 30, 2013 to \$101.3 million from \$98.3 million for the three months ended September 30, 2012, an increase of \$3.0 million or 3%. Selling, general and administrative expenses, as a percentage of net revenue, were 28.3% for the three months ended September 30, 2013 compared to 28.9% for the three months ended September 30, 2012.

The increase in selling, general and administrative expenses was primarily due to an increase in the number of sales and administrative personnel to support our growth and other expenses related to the increase in our sales. The selling, general and administrative expenses were favorably impacted by the movement of international currencies against the U.S. dollar, which decreased our expenses by approximately \$0.8 million for the three months ended September 30, 2013, as reported in U.S. dollars. As a percentage of net revenue, we expect our future selling, general and administrative expenses to be approximately 28%.

Research and Development Expenses

Research and development expenses increased slightly for the three months ended September 30, 2013 to \$27.4 million from \$27.2 million for the three months ended September 30, 2012, an increase of \$0.1 million. Research and development expenses, as a percentage of net revenue, were 7.7% for the three months ended September 30, 2013 compared to 8.0% for the three months ended September 30, 2012.

The increase in research and development expenses was primarily due to an increase in the number of research and development personnel, consulting and contractor expenses and an increase in materials and tooling costs incurred to facilitate development of new products. The research and development expenses were favorably impacted by the movement of international currencies against the U.S. dollar, which decreased our expenses by approximately \$2.3 million for the three months ended September 30, 2013, as reported in U.S. dollars. As a percentage of net revenue, we expect our future research and development expenses to be approximately 8%.

Amortization of Acquired Intangible Assets

Amortization of acquired intangible assets for the three months ended September 30, 2013 totaled \$2.4 million, compared to \$2.6 million for the three months ended September 30, 2012. The reduction in amortization expense is mainly attributable to certain acquired intangibles reaching the end of their useful lives and therefore being fully amortized.

Total Other Income, Net

Total other income, net for the three months ended September 30, 2013 was \$5.2 million compared to \$10.4 million for the three months ended September 30, 2012. The decrease in total other income, net, was due primarily to losses on foreign currency transactions, and lower net interest income due primarily to lower interest rates on cash balances held.

Income Taxes

Our effective income tax rate of approximately 20.7% for the three months ended September 30, 2013 was lower than our effective income tax rate of approximately 21.6% for the three months ended September 30, 2012. The lower effective income tax rate was primarily due to a change in the geographic mix of our taxable income, including the lower taxes associated with our Singapore and Malaysia manufacturing operations. Our Singapore and Malaysia operations operate under certain tax holidays and tax incentive programs which will expire in whole or in part at various dates through June 30, 2020. As of

the quarter ended September 30, 2013, we have not provided for U.S. income taxes for the undistributed earnings of our foreign subsidiaries. These earnings are intended to be permanently reinvested outside the United States.

Net Income

As a result of the factors above and share repurchases, our net income and earnings per share for the three months ended September 30, 2013 was \$80.9 million or \$0.56 per diluted share compared to net income of \$71.3 million or \$0.49 per diluted share for the three months ended September 30, 2012, an increase of 14% over the three months ended September 30, 2012.

Liquidity and Capital Resources

As of September 30, 2013 and June 30, 2013, we had cash and cash equivalents of \$976.6 million and \$876.0 million, respectively. Working capital was \$946.9 million and \$874.8 million at September 30, 2013 and June 30, 2013, respectively.

As of September 30, 2013 and June 30, 2013, our cash and cash equivalent balances held within the United States amounted to \$28.1 million and \$38.2 million, respectively. Our remaining cash and cash equivalent balances at September 30, 2013 and June 30, 2013, of \$948.5 million and \$837.8 million, respectively, were held by our non-U.S. subsidiaries and would be subject to tax if repatriated. If these funds were needed for our operations in the United States, we would be required to accrue and pay United States taxes to repatriate these funds. However, our intent is to permanently reinvest these funds outside of the United States and our current plans do not demonstrate a need to repatriate them to fund our United States operations. Our cash and cash equivalent balances are held at highly rated financial institutions.

Inventories at September 30, 2013 were \$175.4 million, a decrease of \$17.8 million or 9% over the September 30, 2012 balance of \$193.2 million. The decrease in inventories was mainly due to improved inventory management.

Accounts receivable at September 30, 2013 were \$282.4 million, an increase of \$15.9 million or 6% over the September 30, 2012 accounts receivable balance of \$266.5 million. Accounts receivable days outstanding of 69 days at September 30, 2013 was lower than the 71 days at September 30, 2012. Our allowance for doubtful accounts as a percentage of total accounts receivable at September 30, 2013 was 4.2% compared to 3.0% at June 30, 2013. The increase in our allowance for doubtful debts as a percentage of total accounts receivable was predominantly attributable to an additional provision for one customer account during the September 2013 quarter.

During the three months ended September 30, 2013, we generated cash of \$90.4 million from operations compared to \$78.3 million for the three months ended September 30, 2012. Movements in foreign currency exchange rates during the three months ended September 30, 2013 had the effect of increasing our cash and cash equivalents by \$21.7 million, as reported in U.S. dollars. During the three months ended September 30, 2013 and 2012, we repurchased 0.4 million and 0.2 million shares at a cost of \$21.1 million and \$8.1 million, respectively. During the three months ended September 30, 2013 and 2012, we also paid dividends totaling \$35.5 million and \$22.8 million, respectively.

Credit Facility

During the year ended June 30, 2011, we entered into a credit agreement with lenders, including Union Bank, N.A., as Administrative Agent, Swing Line Lender and L/C Issuer, HSBC Bank USA, National Association, as Syndication Agent and Union Bank, N.A., HSBC Bank USA, National Association, Commonwealth Bank of Australia and Wells Fargo Bank, N.A. The credit agreement provides a \$300 million three-year revolving credit facility, with an uncommitted option to increase the credit facility by an additional \$100 million. The credit facility also includes a \$10 million sublimit for letters of credit. The credit facility terminates on February 10, 2014, at which time all unpaid principal and interest under the loans must be repaid. The outstanding principal amount due under the credit facility will bear interest at a rate equal to, at our option, either (i) LIBOR plus 1.5% to 2.0% (depending on the applicable leverage ratio) or (ii) a base rate, as defined in the credit agreement, plus 0.5% to 1.0% (depending on the applicable leverage ratio) apply on the unused portion of the credit facility. When we executed the credit agreement, we used a portion of the credit facility. When we executed the credit agreement, we used a portion of the credit facility with gredit facility with union Bank, N.A., which was then terminated.

Our obligations under the credit agreement are secured by (a) the corporate stock we hold in our subsidiaries ResMed Corp. and ResMed Motor Technologies Inc. ("ResMed Motor"), and (b) up to 65% of the ownership interests we hold in our subsidiary ResMed EAP Holdings LLC ("ResMed EAP"). Our

obligations under the credit agreement are also guaranteed by our subsidiaries ResMed Corp and ResMed Motor. The credit agreement contains customary covenants, including certain financial covenants and an obligation that we maintain certain financial ratios, including a maximum ratio of Funded Debt to EBITDA (each as defined in the credit agreement), an interest coverage ratio and a maximum amount of annual capital expenditures. The entire principal amount of the credit facility and any accrued but unpaid interest may be declared immediately due and payable if an event of default occurs. Events of default include failure to make payments when due, a default in the performance of any covenants in the credit agreement or related documents or certain changes of control of us or our subsidiaries ResMed Corp., ResMed Motor, ResMed Limited, ResMed Holdings Ltd/LLC or ResMed EAP.

On January 25, 2012, we entered into a first amendment to the credit agreement. The amendment increases, from \$300 million to \$400 million, the maximum principal amount that can be borrowed on a revolving basis under the credit agreement, subject to customary conditions

At September 30, 2013, we were in compliance with our debt covenants and there was \$360.0 million outstanding under the credit agreement. As the credit facility terminates on February 10, 2014, we are currently finalizing a new financing facility. We expect that the new facility will have similar or more favorable terms to the existing facility and that it will be in place before our existing facility expires.

We expect to satisfy all of our liquidity requirements through a combination of cash on hand, cash generated from operations and debt facilities.

Common Stock

On August 24, 2011, our board of directors approved a new share repurchase program, authorizing us to acquire up to an aggregate of 20.0 million shares of ResMed Inc. common stock. The program allows us to repurchase shares of our common stock from time to time for cash in the open market, or in negotiated or block transactions, as market and business conditions warrant. This program canceled and replaced our previous share repurchase program authorized on May 27, 2009 pursuant to which we had repurchased 10.0 million shares. These were in addition to the 6.6 million shares repurchased under an earlier program authorized on June 6, 2002. The new program authorizes us to purchase in addition to the shares we repurchased under our previous programs. There is no expiration date for this program. All share repurchases since August 24, 2011 have been executed in accordance with this program.

During the three months ended September 30, 2013, we repurchased 0.4 million shares at a cost of \$21.1 million. At September 30, 2013, we have repurchased a total of 32.5 million shares at a cost of \$1.1 billion. Shares that are repurchased are classified as treasury stock pending future use and reduce the number of shares outstanding used in calculating earnings per share. At September 30, 2013, 4.1 million additional shares can be repurchased under the approved share repurchase program.

Critical Accounting Principles and Estimates

The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and judgments that affect our reported amounts of assets and liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an ongoing basis we evaluate our estimates, including those related to allowance for doubtful accounts, inventory reserves, warranty obligations, goodwill, potentially impaired assets, intangible assets, income taxes and contingencies.

We state these accounting policies in the notes to the financial statements and at relevant sections in this discussion and analysis. The estimates are based on the information that is currently available to us and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could vary from those estimates under different assumptions or conditions.

For a full discussion of our critical accounting policies, see our Annual Report on Form 10-K for the year ended June 30, 2013.

Recently Issued Accounting Pronouncements

See note 2 to the condensed consolidated financial statements for a description of recently issued accounting pronouncements, including the expected dates of adoption and estimated effects on our results of operations, financial positions and cash flows.

Off-Balance Sheet Arrangements

As of September 30, 2013, we are not involved in any significant off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of Regulation S-K promulgated by the SEC.

Foreign Currency Market Risk

Our reporting currency is the U.S. dollar, although the financial statements of our non-U.S. subsidiaries are maintained in their respective local currencies. We transact business in various foreign currencies, including a number of major European currencies as well as the Australian and Singapore dollar. We have significant foreign currency exposure through both our Australian and Singapore manufacturing activities and international sales operations. We have established a foreign currency hedging program using purchased currency options and forward contracts to hedge foreign-currency-denominated financial assets, liabilities and manufacturing cash flows. The goal of this hedging program is to economically manage the financial impact of foreign currency exposures predominantly denominated in euros, Australian dollars and Singapore dollars. Under this program, increases or decreases in our foreign-currency-denominated financial assets, liabilities, and firm commitments are partially offset by gains and losses on the hedging instruments. We do not enter into financial instruments for trading or speculative purposes. The foreign currency derivatives portfolio is recorded in the condensed consolidated balance sheets at fair value and included in other assets or other liabilities. All movements in the fair value of the foreign currency derivatives are recorded within other income, net, on our condensed consolidated statements of income.

The table below provides information (in U.S. dollars) on our foreign-currency-denominated financial assets by legal entity functional currency as of September 30, 2013 (in thousands):

Interest Rate Risk

We are exposed to risk associated with changes in interest rates affecting the return on our cash and cash equivalents and debt. At September 30, 2013, we held cash and cash equivalents of \$976.6 million principally comprised of bank term deposits and at call accounts and are invested at both short-term fixed interest rates and variable interest rates. At September 30, 2013, we had total long-term debt, including the current portion of those obligations, of \$360.8 million of which, \$360.0 million is subject to variable interest rates. A hypothetical 10% change in interest rates during the three months ended September 30, 2013, would not have had a material impact on pretax income. We have no interest rate hedging agreements.

Controls and Procedures

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and in reaching a reasonable level of assurance management necessarily was required to apply its judgment in evaluating the cost benefit relationship of possible controls and procedures.

As required by Rule 13a-15(b) of the Exchange Act, we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of September 30, 2013.

There has been no change in our internal controls over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

(4) In addition to the powers and authorities hereinbefore or by statute expressly conferred upon them, the directors are hereby empowered to exercise all such powers and do all such acts and things as may be exercised or done by the Corporation; subject, nevertheless, to the provisions of the statutes of Delaware, of this certificate, and to any bylaws from time to time made by the stockholders; provided, however, that no bylaws so made shall invalidate any prior act of the directors which would have been valid if such by-law had not been made.

EIGHTH: The Corporation reserves the right to amend, alter, change or repeal any provision contained in this certificate of incorporation in the manner now or hereafter prescribed by law, and all rights and powers conferred herein on stockholders, directors and officers are subject to this reserved power."

RESOLVED, that pursuant to the authority granted to and vested in the Board of Directors of this Corporation (hereinafter called the 'Board of Directors'' or the "Board") in accordance with the provisions of the Certificate of Incorporation, the Board of Directors hereby creates a series of Preferred Stock, par value \$.01 per share (the "Preferred Stock"), of the Corporation and hereby states the designation and number of shares, and fixes the relative rights, preferences, and limitations thereof as follows:

Such number of shares may be increased or decreased by resolution of the Board of Directors; provided, that no decrease shall reduce the number of shares of Series A Preferred Stock to a number less than the number of shares then outstanding plus the number of shares reserved for issuance upon the exercise of outstanding options, rights or warrants or upon the conversion of any outstanding securities issued by the Corporation convertible into Series A Preferred Stock.

Section 2. Dividends and Distributions.

(A) Subject to the rights of the holders of any shares of any series of Preferred Stock (or any similar stock) ranking prior and superior to the Series A Preferred Stock with respect to dividends, the holders of shares of Series A Preferred Stock, in preference to the holders of Common Stock, par value \$.004 per share (the "*Common Stock*"), of the Corporation, and of any other junior stock, shall be entitled to receive, when, as and if declared by the Board of Directors out of funds legally available for the purpose, quarterly dividends payable in cash on the first day of March, June, September and December in each year (each such date being referred to herein as a "*Quarterly Dividend Payment Date*"), commencing on the first Quarterly Dividend Payment Date after the first issuance of a share of faction of a share of Series A Preferred Stock, in an amount per share (rounded to the nearest cent) equal to the greater of (a) \$1.00 or (b) subject to the provision for adjustment hereinafter set forth, 100 times the aggregate per share amount of all cash dividends, and 100 times the aggregate per share a of Common Stock (by reclassification or otherwise), declared on the Common Stock since the immediately preceding Quarterly Dividend Payment Date or, with respect to the first Quarterly Dividend Payment Date, since the first issuance of any share of faction of a share of Series A Preferred Stock, in a advidend payable in shares of Common Stock. In the event the Corporation shall at any time declare or pay any dividend on the Common Stock payable in shares of Common Stock, the in each such case the amount to which holders of shares of Series A Preferred Stock were entitled immediately prior to such event under clause (b) of the preceding sentence shall be adjusted by multiplying such amount by a fraction, the numerator of which is the number of shares of Common Stock or were outstanding immediately prior to such event.

(C) Dividends shall begin to accrue and be cumulative on outstanding shares of Series A Preferred Stock from the Quarterly Dividend Payment Date next preceding the date of issue of such shares, unless the date of issue of such shares is prior to the record date for the first Quarterly Dividend Payment Date, in which case dividends on such shares shall begin to accrue from the date of issue of such shares, or unless the date of issue is a Quarterly Dividend Payment Date or is a date after the record date for the determination of holders of shares of Series A Preferred Stock entitled to receive a quarterly dividend and before such Quarterly Dividend Payment Date, in either of which events such dividends shall begin to accrue and be cumulative from such Quarterly Dividend Payment Date. (B) Except as otherwise provided herein, in any other Certificate of Designations creating a series of Preferred Stock or any similar stock, or by law, the holders of shares of Series A Preferred Stock and the holders of shares of Common Stock and any other capital stock of the Corporation having general voting rights shall vote together as one class on all matters submitted to a vote of stockholders of the Corporation.
